## Main Street Bikeway

### Bellevue Way to 108th Avenue

### Coming Fall 2019

September 2019

### Overview

The Bellevue Transportation Department is installing new bike lanes along several blocks of Main Street this fall. These improvements are an extension of existing lanes on the west end of the corridor. The project is funded by the Neighborhood Safety, Connectivity and Congestion Levy [BellevueWA.gov/transportationlevy](http://BellevueWA.gov/transportationlevy).

### Project Description

This bikeway project will:

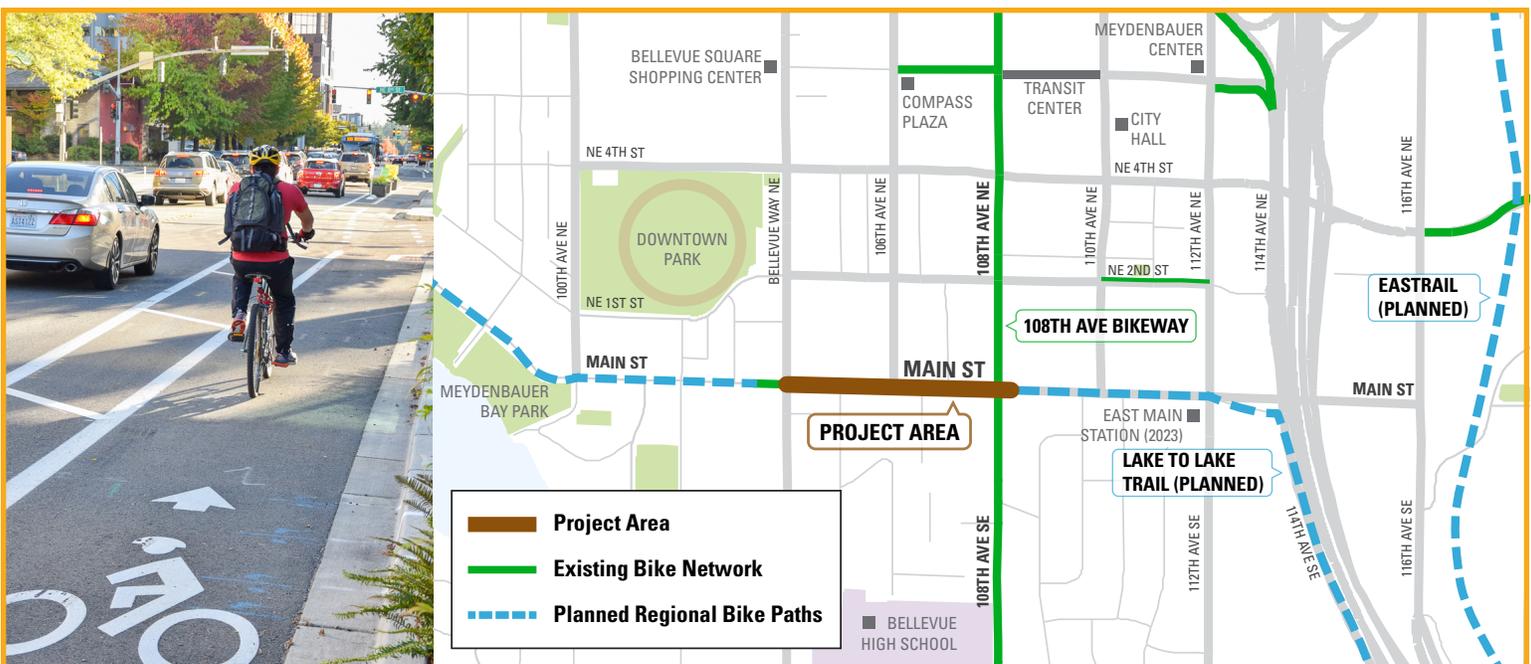

- extend the eastbound (uphill) buffered bike lane through 108th Avenue NE;
- extend the westbound (downhill) striped bike lane from 108th to 106th Avenue NE;
- repurpose one of two eastbound travel lanes to provide street space for people bicycling;
- add an eastbound right turn lane at 108th Avenue NE.

### Benefits

These improvements help to make bicycling a safer and more comfortable travel option for more people. The Main Street Bikeway will connect the shops and restaurants of Old Bellevue to the offices, residences, Transit Center, and Bellevue High School along the 108th Avenue Bikeway.

This project is the next small step toward completing a connected bike network Downtown. It uses low-cost improvements to fill a gap between existing bike lanes. Vehicle travel in both directions will be maintained, and travel times are projected to remain the same. Outcomes will be monitored and refinements made as needed.

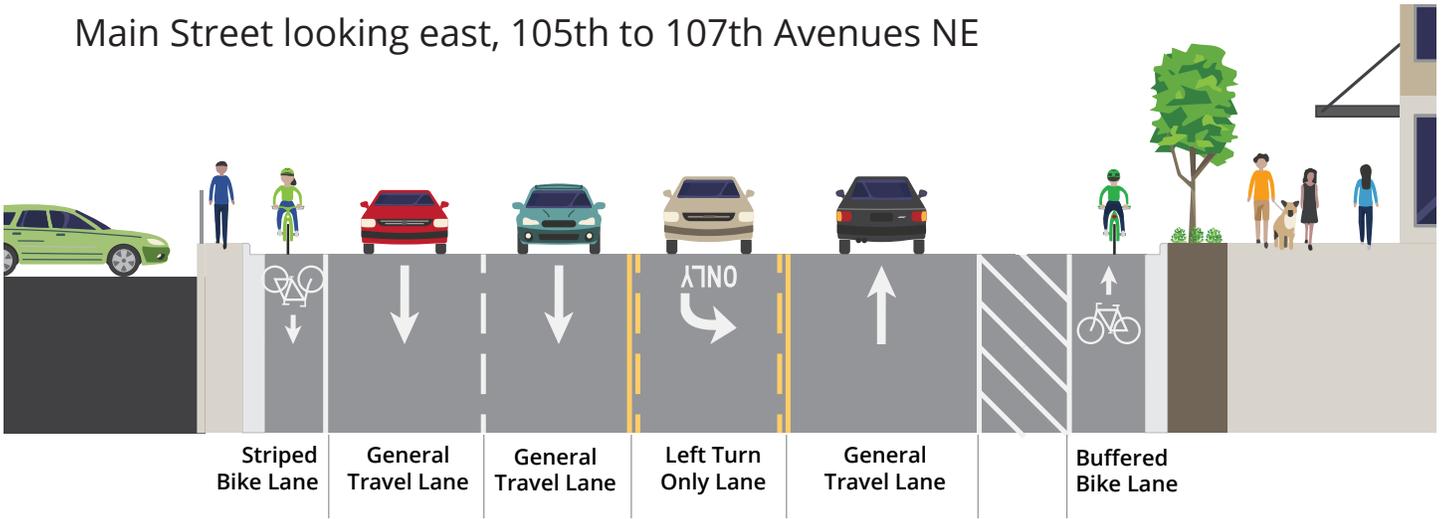

As properties on the north side of Main Street redevelop over the coming years, the street will be widened to create additional space so the westbound bike lane can also be separated.
