A Figure 1.0-1: Historic Ice House and Whaling Building at Bellevue Marina

CHAPTER 1: EXECUTIVE SUMMARY

The City of Bellevue has long had a vision of connecting the Meydenbauer Bay waterfront to Downtown Park to create a signature park and waterfront destination. In 1953 King County conveyed a small parcel to the City to use for park purposes. With acquisition of a small adjacent parcel soon after, the City improved the existing Beach Park. In 1987 the City's Park, Recreation, and Open Space Plan identified acquisition of the Meydenbauer Bay waterfront as a major focus to provide unequalled waterfront amenities and connect the waterfront to Downtown Park and the downtown. Since the late 1990s, Bellevue has acquired land along Meydenbauer Bay as it became available, to expand Meydenbauer Beach Park and provide an important recreational opportunity for its citizens. The City Council recognized the need to plan for the ultimate goal of achieving a connection of this key waterfront area to the downtown area and enhancing the surrounding area.

In 2007, the City Council appointed the Meydenbauer Bay Park and Land Use Plan Steering Committee (Steering Committee) to serve in an advisory capacity to the Council, Planning Commission and Parks Board. Representing various neighborhoods and citywide interests, the Steering Committee was charged with guiding staff in public outreach and development of draft alternatives for both the park master plan and the neighboring upland area, evaluating those alternatives, and ultimately recommending final land use and

park master plan alternatives and actions to implement the vision. The Steering Committee's work was guided by broad planning principles approved by the Council for the project.

The City initiated its planning process for the Meydenbauer Bay Park and Land Use Plan (the Plan) in early 2007, which resulted in a Preliminary Preferred Land Use Plan (PPLUP) for land uses and development intensity in the upper block and south of Main Street portion of the study area (Sasaki 2008). When the City continued its planning process with a focus on the new waterfront park in May 2008, it also focused on reintegrating the new park and uplands, with greater attention to the edge condition and relationship of these two important components of the Plan.

The Plan illustrates potential building masses, siting, relationships, and concepts for the upland area that provide pedestrian connections between the new waterfront park and upland areas, as well as physical and interactive spaces and amenities that reinforce the pedestrian experience and the connection of the waterfront to nearby upland areas. The Plan envisions the closure of 100th Avenue SE, and co-ordinated redevelopment of several parcels of land under different ownerships (including one City-owned parcel). The Plan proposes modest policy and regulatory changes to provide some degree of incentive (other than increasing building height or allowing new uses) that could improve the pedestrian environment along the edges of the upper block.

The Plan calls for the development of a memorable waterfront park that will attract people year round with a variety of uses and thoughtfully designed places that respect the setting, express community environmental values, and sup-

port a range of active and passive activities. The waterfront and park are planned to be both a respite within the city and a connection between the city and the lake. The park will be a pedestrian place that encourages contemplation, socializing, and recreation; welcoming visitors who arrive by boat, car, bus, and bicycle or on foot. Streetscape improvements are recommended for several nearby streets with an emphasis on improving pedestrian amenities, safety, and connections to surrounding neighborhoods, Downtown Park, Old Bellevue, and downtown Bellevue.
