

Lakemont Park Trails

3 Miles

Over three miles of multiple-use trails circumnavigate the Lakemont neighborhood and guide visitors between Lakemont and Lewis Creek Parks. Lakemont Park is also home to a large stormwater treatment system. This system reduces flooding and helps protect Lewis Creek and Lake Sammamish from pollution. From the park soft surface trails lead down to Lewis Creek, which carves its way through a labyrinth of Big leaf maple and Douglas-fir on its way to Lake Sammamish. Listen to the babbling of the creek and watch for deer as you explore the vast open space of the Lewis Creek valley.

To reach the trailhead:

  5170 Village Park Drive SE
